

Report by the NSOLA.ORG Webmaster for the NSOLA AGM, 2026-07-19

- Following on from the approval of the new NSOLA logo the masthead photo was replaced by the new logo.
- The website is hosted by Wordpress.com. At the last annual renewal in October 2025 we paid a total of \$29.38 (including taxes) which covered a year of web hosting and the domain name NSOLA.ORG. This is the cheapest option available – we do not subscribe to any added features
- The minimal cost of the website is due to the advertising which is automatically inserted. We have no control of that advertising and all income goes to Wordpress.com.
- On average the site is visited by about 50 people per month viewing about 100 pages.
- I have written and posted 4 articles to the site in the last year, and also posted various NSOLA documents such as minutes, agenda.
- There have been no other changes of any significance over the last year.

I have been running the website for about the last 7 years. It is minimal effort, and I'm happy to continue.

The site acts mainly as a noticeboard for posting notices of upcoming meetings and accessing official NSOLA reports. It gets very little traffic, and rarely is there any feedback, so it has been maintained in pretty much the same format as when I took it over.

I am always happy if a member sends me a posting or an idea for one, and would welcome any suggestions for improvements – always with the proviso that it relates to NSOLA or our lakes, and will be of interest to and benefit our members.
